RE: Terminus 200 Intersection Project

Dear Jason:

I wanted to thank you and your team for exceeding our expectations on this project. We had a very short 48-hour weekend window to remove and replace this intersection and Sinclair executed this tremendous effort as planned.

From your project management in helping source new materials to blend the discontinued products to the skill of your craftsmen that installed new structural concrete and finish pavers, the intersection was ready for business Monday morning, all resulting with a happy client. As with most construction, the project was not without unforeseen difficulties and I truly appreciated your whole team's ability to decipher and solve the issues while still achieving the target.

We look forward to working with Sinclair again on the next one.

Sincerely,

*Powell Turner*
